DIRECTIONS FOR USE

COVERING "PROFITEROLES".

Heat in a bain-marie at 30-35°C the necessary quantity of COVERCREAM and stir well. Plunge cream-puffs into the cream and, using the special fork, make the traditional "Profiteroles".

COVERCREAM covers perfectly cream-puffs with an uniform coat that will remain creamy and brilliant. To obtain a change of colour and taste like milk chocolate is sufficient to mix COVERCREAM CACAO and COVERCREAM BIANCO in the same quantities. Coverings obtained with COVERCREAM maintain their exceptional creamy and brilliant power after freezing too. To obtain good cream-puffs we suggest to use our "GRANBIGNE" (a mix for the cold immediate preparation of cream-puffs) while for their fillings we can offer our "TOP CREAM" and "BABET" (mix for the production of, respectively, cold and warm custard).

COVERINGS AND DECORATIONS OF CAKES AND "SEMIFREDDI".

Heat in a bain-marie at 30-35°C the necessary quantity of COVERCREAM, stir well and cover the cakes.

With COVERCREAM you get refined topping with creamy power that avoids the forming of cracks under the pressure of the knife when cutting. During preparation of "Semifreddi" this characteristic is particularly appreciated both in case of glazing as well as of decoration or variegation. COVERCREAM BIANCO at room temperature has a smooth and creamy structure that enables to use it immediately as decoration.

AROMATIZER FOR CREAMS.

ALLERGENS / CONTAMINATIONS

ALLERGENS

CONTAMINATIONS

COVERCREAM BIANCO is suitable for the preparation of creams that, compared with the creams obtained with normal recipes, are enormously improved in taste and lightness.
