		of humidifier, cover the dough with a plastic cloth.
		The dough shall quadruple its initial volume.
		ADVICE:
		- We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the
		leavening and verify the quadruplication of the volume.

- If the temperature of the first dough is above 28°C, it will be necessary to decrease the leavening

#### SECOND DOUGH

#### **PREPARATION INGREDIENTS** DOLCE FORNO g 3500 The next morning, the dough shall be slightly curved. EGG YOLK g 1350 Add DOLCE FORNO and water to the first dough and knead for 5-10 minutes. UNSALTED BUTTER 82% FAT g 700 When well-combined, add sugar, salt and one part of egg yolk. Then add the remaining egg yolk in g 1730 MASCARPONE CHEESE two times. g 700 CASTER SUGAR HONEY g 350 dough in 4 times. SALT g 100 Add in two-three times the mascarpone cheese.

Meantime, prepare a mixture of softened butter and honey. Once the mixture is ready, add it to the

Add the almond and coffee inclusions and mix.

Let the dough rest in the proofer room at 28-30°C for about 90 minutes.

Divide the dough into portions of the required size and roll each portion up into into a ball shape.

Move onto boards or trays and leave to rest at 28-30°C for another 20 minutes.

Roll them up tight again and transfer into the specific paper moulds.

Put in the proofer room at 28-30°C with relative humidity of about 60-70% for 4-5 hours, until the top of the dough nearly leans out of the edge of the mould (1 cm below). If the proofer room is devoid of humidifier, cover the dough with plastic sheets.

At the end of the rising, leave the panettoni exposed to the air for 10-15 minutes until a light film forms over the surface.

With a small, sharp knife, make two superficial cuts to create a cross (these cuts shall not be deep and are necessary to give end product the typical and traditional shape).

Cut the dough under the 4 flaps while throwing and folding them back, then place a pat of butter and return the 4 flaps back to the original position.

Bake at 165-185°C, time depending on the weight (consider about 35-40 minutes for 500g panettoni and 50-60 minutes for 1000g ones), until the temperature of the center reaches 92-94°C.

As soon as they are removed from the oven, the panettoni should be flipped upside down with the specific toothed racks and left to cool for 8-10 hours at least before being wrapped in Moplefan bags.
