		of humidifier, cover the dough with a plastic cloth.
		The dough shall quadruple its initial volume.
		ADVICE:
		- We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the
		leavening and verify the quadruplication of the volume.
		- We suggest to begin to knead at second speed and then, when at $\ensuremath{^{3}\!\!/}$ of the kneading time, change
		to first speed and bring the kneading to end.
		- If the temperature of the first dough is above 28°C, it will be necessary to decrease the leavening
		time.
		- If you are using a planetary mixer with a "dough hook" attachment or a spiral mixer you will have to
		reduce the amount of water specified in the first dogh (we suggest you to use 2400/2250 gr)
