

# PANETTONE - PLATINUM RECIPE (DOLCE FORNO MAESTRO-NATUR ACTIV)

## LARGE LEAVENED PRODUCTS

DIFFICULTY LEVEL B B

#### FIRST DOUGH

THO DOOD!		
INGREDIENTS		PREPARATION
DOLCE FORNO MAESTRO	g 6500	Knead DOLCE FORNO MAESTRO, NATUR ACTIV and all the dose of water indicated in the recipe.
NATUR ACTIV	g 400	When the dough begins to take shape pour the sugar and then the yolks gradually in more than
WATER	g 2600	once and keep on kneading until the dough is well-combined and smooth.
EGG YOLK	g 1600	At the end, add softened butter in 3-4 times.
CASTER SUGAR	g 500	Make sure that the temperature of the dough is 26-28°C.
UNSALTED BUTTER 82% FAT	g 2000	Let rise for 12-14 hours at 22-24°C with the 70-80% of relative humidity. If the proofer room is devoid
		of humidifier, cover the dough with a plastic cloth.
		The dough shall quadruple its initial volume.
		ADVICE:
		- We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the
		leavening and verify the quadruplication of the volume.
		- We suggest to begin to knead at second speed and then, when at $^{3}\!4$ of the kneading time, change
		to first speed and bring the kneading to end.
		- If the temperature of the first dough is above 28°C, it will be necessary to decrease the leavening
		time.
		- If you are using a planetary mixer with a "dough hook" attachment or a spiral mixer you will have to
		reduce the amount of water specified in the first dogh from 2600g to 2450g.

humidifier, cover the dough with plastic sheets.

#### FINAL COMPOSITION

INGREDIENTS

At the end of the rising, leave the panettoni exposed to the air for 20-25 minutes until a light film forms over the surface.

With a small, sharp knife, make two superficial cuts to create a cross, cut the dough under the 4 flaps while throwing and folding them back, then place a pat of butter and return the 4 flaps back to the original position.

Bake at 165-185°C, time depending on the weight (consider about 35-40 minutes for 500g panettoni and 50-55 minutes for 1000g ones), until the temperature of the center reaches 92-95°C.

As soon as they are removed from the oven, the panettoni should be placed onto the specific toothed racks and left to cool upside down for 8-10 hours at least before being wrapped in Moplefan bags.
