UNSALTED BUTTER 82% FAT - MELTED	g 200	Combine the two mixture in a planetary mixer by mixing at low speed for a few seconds.
		ADVISE:
		- For best results, we recommend to measured the doses out so that they are proportionate to
		the volume of bowl of the planetary mixer.
		- Very cold temperature of eggs and water reduce the volume of the whipped mixture: if the eggs
		you use are pasteusized at about 5°C, it is important to extend the whipping.
		- You can replace water with eggs to further improve the chararacteristic of softness and flavour
		of the end products.

#### FINAL COMPOSITION

Grease and flour the cake moulds, then cast the batter in and fill them for 2/3 of their volume.
