WATER - AT ROOM TEMPERATURE

g 1000
g 600
g 200

PREPARATION

Whip all the ingredients in a planetary mixer with the whisk attachment for 10-12 minutes at medium speed.

ADVISE:

- For best results, we recommend to measure the doses out so that they are proportionate to the volume of bowl of the planetary mixer.
- Very cold temperature of eggs and water reduce the volume of the whipped mixture: if the eggs you use are pasteurized at about 5°C, it is important to extend the whipping.
- You can replace water with eggs to further improve the characteristic of softness and flavour of the end products.

FINAL COMPOSITION

Grease and flour the cake moulds, then cast the batter in and fill them for 2/3 of their volume.

Bake at 180-190°C for about 30 minutes in a deck oven or at 170-180°C for about 35 minutes in rack fan oven.

Let cool down, then remove from mould.
