Bake in a deck oven for 6-7 minutes at 200-220°C (closed valve).

Let cool down for a few minutes, then cover with plastic sheets to avoid drying and refrigerate the rollè until you have to use it.

ADVICE:

- For best results, we recommend to measured the doses out so that they are proportionate to the volume of bowl of the planetary mixer.

- Very cold temperature of eggs and water reduce the volume of the whipped mixture: if the eggs you use are pasteusized at about 5°C, it is important to extend the whipping.

- You can replace water with eggs to further improve the characteristic of softness and flavour of the end products.
