

## TANGERIN AND GINGER VENEZIANA

### LARGE LEAVENED PRODUCTS

DIFFICULTY LEVEL

#### FIRST DOUGH

#### INGREDIENTS

DOLCE FORNO MAESTRO  
YEAST  
WATER  
CASTER SUGAR  
EGG YOLK  
UNSALTED BUTTER 82% FAT

#### PREPARATION

g 6500 Knead DOLCE FORNO MAESTRO, yeast and water indicated in the recipe in three times.  
g 30 When the dough begins to take shape pour the sugar and then the yolks gradually in more than  
g 2400 once and keep on kneading until the dough is well-combined and smooth.  
g 500 At the end, add softened butter in 3-4 times.  
g 1600 Make sure that the temperature of the dough is 26-28°C.  
g 2000 Let rise for 12-14 hours at 20-22°C with the 60-70% of relative humidity. If the proofer room is devoid  
of humidifier, cover the dough with a plastic cloth.  
The dough shall quadruple its initial volume.  
ADVICE:  
- We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the  
leavening and verify the quadruplication of the volume.  
- We suggest to begin to knead at second speed and then, when at ¾ of the kneading time, change  
to first speed and bring the kneading to end.  
- If the temperature of the first dough is above 28°C, it will be necessary to decrease the leavening  
time.  
IMPORTANT:  
If you are using a planetary mixer with a "dough hook" attachment or a spiral mixer you will have to  
reduce the amount of water specified in the first dough (we suggest you to use 2400/2250 gr)

## SECOND DOUGH

---

### INGREDIENTS

DOLCE FORNO MAESTRO  
WATER  
CASTER SUGAR  
SALT  
EGG YOLK  
UNSALTED BUTTER 82% FAT  
HONEY  
CANDIED TANGERIN PEEL IN CUBES  
GROUND GINGER

g 3500  
g 600  
g 600  
g 110  
g 1000  
g 1800  
g 550  
g 5500  
g 90

### PREPARATION

The next morning, the dough shall be quadrupled and slightly curved.

Add DOLCE FORNO MAESTRO and water to the first dough and knead for 5-10 minutes.

When well-combined, add sugar, honey, salt and ginger's powder.

Add the egg yolk in many times.

At the end, add softened butter in 3-4 times.

Be sure that the temperature of the dough is 26-28°C.

Lastly add candied tangerin peel in cubes.

Let the dough rest in the proofer room at 28-30°C for about 90 minutes.

Divide the dough into portions of the required size and roll each portion up into a ball shape.

Move onto boards or trays and leave to rest at 28-30°C for another 20 minutes.

Roll them up tight again and transfer into the specific paper moulds.

Put in the proofer room at 28-30°C with relative humidity of about 60-70% until the top of the dough will be up to 1cm from the edge of the mold; if the proofer room is devoid of humidifier, cover the dough with plastic sheets.

## COCOA GLAZE

---

### PREPARATION

Mix all the ingredients in a planetary mixer with a paddle attachment at low speed for 2 minutes.

## DECORATION

---

## FINAL COMPOSITION

At the end of the rising, leave the veneziana exposed to the air for 20 minutes until a light film forms over the surface.

Cut the four flaps under the skin and place a small piece of cold butter in the center of the veneziana.

Bake at 160-170°C, time depending on the weight (consider about 50-55 minutes for 1000g veneziana), until the temperature of the center reaches 93-95°C.

As soon as they are removed from the oven, the veneziana should be placed onto the specific toothed racks and left to cool upside down for 8-10 hours at least before being wrapped in Moplefan bags.
