# TANGERIN AND GINGER VENEZIANA

## LARGE LEAVENED PRODUCTS

DIFFICULTY LEVEL

FIRST DOUGH		
INGREDIENTS		PREPARATION
DOLCE FORNO MAESTRO	g 6500	Knead DOLCE FORNO MAESTRO, yeast and water indicated in the recipe in three times.
YEAST	g 30	When the dough begins to take shape pour the sugar and then the yolks gradually in more than
WATER	g 2400	once and keep on kneading until the dough is well-combined and smooth.
CASTER SUGAR	g 500	At the end, add softened butter in 3-4 times.
EGG YOLK	g 1600	Make sure that the temperature of the dough is 26-28°C.
UNSALTED BUTTER 82% FAT	g 2000	Let rise for 12-14 hours at 20-22°C with the 60-70% of relative humidity. If the proofer room is devoid
		of humidifier, cover the dough with a plastic cloth.
		The dough shall quadruple its initial volume.
		ADVICE:
		- We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the
		leavening and verify the quadruplication of the volume.
		- We suggest to begin to knead at second speed and then, when at $^3\!\!4$ of the kneading time, change
		to first speed and bring the kneading to end.
		- If the temperature of the first dough is above 28°C, it will be necessary to decrease the leavening
		time.
		IMPORTANT:
		If you are using a planetary mixer with a "dough hook" attachment or a spiral mixer you will have to
		reduce the amount of water specified in the first dogh (we suggest you to use 2400/2250 gr)

#### SECOND DOUGH

INGREDIENTS		PREPARATION
DOLCE FORNO MAESTRO	g 3500	The next morning, the dough shall be quadrupled and slightly curved.
WATER	g 600	Add DOLCE FORNO MAESTRO and water to the first dough and knead for 5-10 minutes.
CASTER SUGAR	g 600	When well-combined, add sugar, honey, salt and ginger's powder.
SALT	g 110	Add the egg yolk in many times.
EGG YOLK	g 1000	At the end, add softened butter in 3-4 times.
UNSALTED BUTTER 82% FAT	g 1800	Be sure that the temperature of the dough is 26-28°C.
HONEY	g 550	Lastly add candied tangerin peel in cubes.
CANDIED TANGERIN PEEL IN CUBES	g 5500	Let the dough rest in the proofer room at 28-30°C for about 90 minutes.
GROUND GINGER	g 90	Divide the dough into portions of the required size and roll each portion up into a ball shape.
		Move onto boards or trays and leave to rest at 28-30°C for another 20 minutes.
		Roll them up tight again and transfer into the specific paper moulds.
		Put in the proofer room at 28-30°C with relative humidity of about 60-70% until the top of the dough
		will be up to 1cm from the edge of the mold; if the proofer room is devoid of humidifier, cover the
		dough with plastic sheets.

#### COCOA GLAZE

#### PREPARATION

Mix all the ingredients in a planetary mixer with a paddle attachment at low speed for 2 minutes.

#### DECORATION

#### **FINAL COMPOSITION**

At the end of the rising, leave the veneziana exposed to the air for 20 minutes until a light film forms over the surface.

Cut the four flaps under the skin and place a small piece of cold butter in the center of the veneziana.

Bake at 160-170°C, time depending on the weight (consider about 50-55 minutes for 1000g veneziana), until the temperature of the center reaches 93-95°C.

As soon as they are removed from the oven, the veneziana should be placed onto the specific toothed racks and left to cool upside down for 8-10 hours at least before being wrapped in Moplefan bags.
