| | | - We suggest to begin to knead at second speed and then, when at $\%$ of the kneading time, change |
| | | to first speed and bring the kneading to end. |
| | | - If the temperature of the first dough is above 28°C, it will be necessary to decrease the leavening |
| | | time. |
| | | - If you are using a planetary mixer with a "dough hook" attachment or a spiral mixer you will have to |
